EXPERIENCE SUMMARY

Data Scientist with 7+ years of experience building scalable machine learning and predictive analytics solutions in large-scale production environments. Skilled in fraud detection, anomaly detection, statistical analysis, KPI reporting, and SQL-driven analytics frameworks. Proven impact delivering 45–65% fraud reduction and \$1M+ monthly savings through ML optimization, experimentation, and distributed data systems using Python, Spark, AWS, and cloud-native monitoring tools.

SKILLS

- **Machine Learning & AI** : Supervised & Unsupervised Learning, Predictive Analytics, Fraud Detection, Anomaly Detection, Deep Learning, Generative AI, LLMs, Statistical Analysis
- **Big Data & Data Engineering**: Apache Spark, Hadoop, Databricks, Apache NiFi, Apache Airflow, CI/CD Pipelines
- **ML Frameworks**: scikit-learn, XGBoost, PyTorch, Spark MLlib
- **Cloud**: AWS, Google Cloud, Snowflake
- **Monitoring & Logging Analytics**: AWS Kibana / OpenSearch, Splunk, Grafana, ML Monitoring, Drift Detection
- **Visualization**: Tableau, Power BI
- **Development & Collaboration**: Git, Version Control, Cross-functional Collaboration

EXPERIENCE

Data Scientist | Randstad Digital LLC (Verizon Wireless) | Irving, TX

November 2019 - Present

- Built and deployed supervised and unsupervised ML models using Python and Apache Spark for payment and login fraud detection, reducing unauthorized transactions by 45% and fraudulent registrations by 65%.
- Architected and deployed an anomaly detection ML model along with supporting rule-based systems, preventing fraudulent order fulfillment and generating \$1M+ in monthly savings.
- Fine-tuned thresholds and risk scoring through A/B testing, predictive modeling, and cost-benefit analysis for controlled risk trade-offs and model optimization.
- Produced and owned weekly and monthly KPI reporting, delivering actionable insights into system performance, operational health, and improvement opportunities.
- Designed end-to-end data and ML pipelines using Apache NiFi, Oracle SQL, Apache Airflow, and CI/CD pipelines for automated ingestion and Spark job orchestration.
- Worked closely with engineering and business stakeholders to support analytics, fraud monitoring, operational investigations, and strategic decision-making during heightened awareness periods.
- Owned dashboards, alerts, and monitoring using OpenSearch (AWS Kibana), Tableau, and Grafana, reducing false positive detections by 47% and enabling real-time debugging.
- Led data analysis and reporting during migration from on-premises infrastructure to AWS, validating data accuracy and improving observability through enhanced database and JSON logging.
- Mentored new team members, assigning tasks, reviewing work, and providing hands-on debugging support.

Software Developer | Wipro Limited (Capital One) | Richmond, VA

February 2019 - October 2019

- Decommissioned Hadoop jobs and migrated workloads to AWS S3 as part of cloud modernization initiatives.
- Managed operational reporting for loan operations, escrow, agency servicing, and core operations teams.
- Forecasted trends and performed data analysis to support strategic business decisions and operational planning.
- Compiled business intelligence data into actionable reports and presentations for leadership stakeholders.

PUBLICATIONS

- Tri-Strategy Remora Optimization Algorithm based SVM for Customer Churn Prediction (2024)

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- IBM Certified Data Science Professional

EDUCATION

- Master of Science (M.S.) in Computer Science | UNIVERSITY OF TEXAS AT ARLINGTON | TX, USA
- Bachelor of Science (B.S.) in Computer Science | RAJIV GANDHI TECHNICAL UNIVERSITY | MP, India
